GEYSER

w a t e r f i l t e r s

Every day Geyser filters purify more than 100 million liters of water

More than 40 million people around the world use Geyser filters

The number of company employees is more than 1,000

13 representative offices in 5 countries

THE MAIN PRODUCT RANGE OF THE COMPANY IS REPRESENTED IN THE FOLLOWING AREAS:

- Household filters
- Water purification systems for country houses
- Industrial water purification equipment
- Recycling water treatment systems for car washes

The first Geyser filters were launched in 1986, the company stands at the origins of the formation of the water purification market.

Geyser is a dynamically growing research and production holding with a decades-long history and tradition. The company's product portfolio includes more than a dozen unique products.

Every year the company invests and conducts thousands of research and development activities, and its specialists develop new types of products – efficient and cost-effective solutions for the customers. In total, Geyser manufactures several thousand products, which are sold throughout Russia and in more than 50 countries around the world.

Geyser Group includes a research department with an analytical laboratory, a design bureau, and a modern thermoplastics and thermosetting plastics production facility. The number of company employees is more than 1,000.

The company has Russian and international patents, certificates, conclusions of high quality products from international organizations, such as the Pasteur Institute.

Today the company has 13 representative offices in major Russian cities: Moscow, Rostov-on-Don, Krasnodar, Krasnoyarsk, Novosibirsk, Ufa, Saratov, Yekaterinburg. And abroad: Almaty, Tashkent, Riga, Belgrade, Bucharest

WATER PURIFICATION TECHNOLOGIES

Aragon – is a unique filtering material, it combines three filtration methods – mechanical, sorption and ion-exchange. Aragon Bio modification additionally disinfects water (removes not only bacteria, but also viruses).

UNIQUE PROPERTIES OF ARAGON:

Anti-discharge – the complex labyrinth structure of the material irreversibly traps all impurities.

Self-indication – a decrease in the pressure of clean water in the faucet signals the need to replace the cartridge.

Regeneration – (restoration of filtering properties) significantly increases the capacity and life of the cartridge at home.

Quasi-softening – the property of the Aragon Bio cartridge to change the structure of hardness salts prevents the formation of scale on the heating elements. During filtration through the Aragon cartridge calcium salts change the form of calcites to useful aragonite (prevention of cardiovascular disease).

Active silver – integrated into the cartridge in indelible form - absolutely safe bacteriostatic effect.

Aragon Bio cartridges are guaranteed to remove major harmful impurities, bacteria and viruses from water. You can drink water purified with the Aragon Bio cartridge WITHOUT BOILING!

Removal of viruses from water by 99.999% is confirmed by research institutes in Russia and Europe.

Institut de microbiologie Pasteur, France

Confirmed 99.999% removal of polioviruses, rotaviruses, hepatitis A virus, salmonella and legionella from water. Standard XP T90-451, France, AUGUST 2014.

Center for Microbiological Research, University of Ferrara, Italy

Destruction of viruses in drinking water by 99.999%. Compliance with European Union standard UNI EN 14476.

EUROFINS International Environmental Laboratory Group, Sweden

Compliance with European drinking water standards.

Research Institute of Influenza, Russia

Removes 99.99% of pathogens harmful to humans from drinking water.

IAPMO R&T Certificate of Conformity Product Listing

Aragon Bio, Fe(Catalon) 10SL cartridges meet the standard: NSF/ANSI 42-2019

Vector State Research Center for Virology and Biotechnology, developer of the EpiVacCorona vaccine

Confirmed 100% efficiency of water purification from coronavirus with Aragon Bio cartridges.

Aragon is used in faucet nozzles, tabletop, stationary and three-stage filters.

Aragon cartridges are also represented by modifications of international standards 10 "SL, 10 "BB, 20 "BB for completing whole-house filter systems.

Catalon is a fundamentally new ion-exchange fibrous material. Catalon has not only chelate properties (selective removal of heavy metal cations), but also amphoteric. Through the combination of these properties, Catalon removes all forms of iron, manganese, zinc, copper, cobalt, nickel, mercury, lead, cadmium and arsenic as well as colloidal iron from water with high efficiency.

Combination with high-quality activated carbon increases the sorption capacity of Catalon, which allows you to qualitatively purify water from chlorine, organic impurities, and improve organoleptic characteristics of water.

Catalon ion-exchange fiber cartridges are suitable for post-treatment of water in drinking water filters. Safety certified according to NSF standards. It is used in pitcher filter cartridges and BAF, Fe, Fe mix, Fe., Postcarbon Smart, Carbon Smart cartridges.

Geyser Max is a technology of complex water purification and softening. The ANTI-SCALE scale-reduction effect of filtration through Aquasoft and Aragon Max cartridges increases filter life by evenly distributing the effectiveness of hardness salt removal over the entire period of operation.

Mineralizer Ca is a technology that allows to saturate purified water with useful calcium in the required concentration. It is used in stationary three-stage filters for soft water. Used in Geyser Prestige reverse osmosis filtration systems.

Baskon Mineralizer is a mineralization technology developed by Geyser, which allows you to get clean and healthy water rich in minerals (potassium, magnesium, calcium). Purified water has a balanced mineral composition. The amount of free radicals in it is reduced and the RedOx potential is reduced.

Calcium strengthens bones, and ensures normal metabolism of the body. Magnesium normalizes the activity of the cardiovascular and endocrine systems of the body; assists in the removal of toxins and heavy metals. Potassium improves brain function. It is important for the heart muscle, heart vessels and capillaries; helps normalize blood pressure and reduce fatigue. Used in Geyser Allegro, Geyser Prestige Smart, Geyser Premium reverse osmosis filtration systems.

Disruptor is a development of the American company Ahlstrom Filtration. Filter material based on nanoaluminum fibers. Removes viruses, bacteria, colloids, iron, humic compounds, hard-to-catch organics. Used in the Geyser Ultra Bio filter.

Ecotar – filter media created by mixing ion-exchange and sorption media, mechanical water purification materials, as well as the addition of silver and materials that prevent biodegradation.

A special feature of Ecotar is its unique ability to remove dissolved iron in high concentrations (up to 30 mg/l). Mechanical impurities, dissolved iron, manganese, organic iron, hardness salts, heavy metal ions, humic and fulvic acids can be simultaneously removed from water.

Topfir is an efficient way of winding polypropylene filament in a PPY cartridge and ion exchange filament of Catalon material. It provides a denser structure so that the Fe and Fe mix cartridges contain more material. This allows you to increase their capacity for the removal of dissolved and colloidal iron.

The use of Topfir technology in mechanical purification cartridges can increase the efficiency of purification from mechanical impurities by more than 2 times.

The use of Topfir technology in mechanical purification cartridges can increase the efficiency of purification from mechanical impurities by more than 2 times.

STATIONARY FILTERS (FILTERS UNDER THE SINK)

SOFT WATER

GEYSER ECO

Modern, compact, efficient system for complete water purification. The housing is made of food-grade stainless steel. The filter is easily connected to the cold water mains with a flexible supply line. Cartridge replacement is quick and easy thanks to the clamp connection.

General technical specifications

Item	Temperature of water to be treated	Filtration rate	Faucet	Service life	Operating pressure	Housing
18053	+4...+40°C	up to 3.6 l/min	No.6	up to 12,000 l	up to 7 atm	stainless steel
18057			without a faucet			

THREE-STAGE FILTERS

General technical specifications

Temperature of water to be treated	+4...+40°C
Filtration rate	up to 3 l/min
Operating pressure	up to 7 atm
Housing	food grade plastic
Manufacture	Russia

GEYSER OPTIMA FOR COMPLETE WATER PURIFICATION

Compact system based on quick-release cartridges. It optimally purifies tap water from harmful impurities. Preserves the natural mineralization of water. Quick cartridge replacement and reliable protection against contact with absorbed contaminants.

● **Effective removal of active chlorine, organics, iron, heavy metals, improvement of taste and odor**

● **Preservation of natural mineralization of water**

Item	Model	Faucet	First stage	Second stage	Third stage
11070	Optima	No.3	Mechanics Smart	Combi Smart	Postcarbon Ag Smart
11071	Optima	without a faucet			

STATIONARY FILTERS

(FILTERS UNDER THE SINK)

SOFT WATER

GEYSER OPTIMA FOR SOFT WATER

Compact three-stage filter with quick-release cartridges provides optimal after-treatment and enrichment of soft water with healthy minerals (mineralized water is beneficial for the body).

● Optimal after-treatment and enrichment of soft water with healthy minerals

Item	Model	Faucet	First stage	Second stage	Third stage
66032	Optima M	No.3	Mechanics Smart	Combi Smart	Baskon Smart
66033	Optima M	without a faucet			

GEYSER SMART FOR COMPLETE WATER PURIFICATION

Compact water purification system with quick-change cartridge technology. Excellent water purification due to the combination of innovative Aragon and Catalon filter media in the cartridges.

● Preservation of the natural mineral composition of water

● Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
11059	Smart Complete water purification	No.3	Mechanics Smart	Combi Smart	Postcarbon Ag

GEYSER SMART UNIVERSAL

Compact water purification system with quick-change cartridge system. Excellent water purification due to the combination of innovative Aragon and Catalon filter media in the cartridges.

● Preservation of the natural mineral composition of water

● Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
11048	Smart Universal	No.3	Carbon Ag	Aragon Smart	Postcarbon Ag
11050	Smart Universal	without a faucet	Carbon Ag	Aragon Smart	Postcarbon Ag
11058	Smart	No.3	Mechanics Smart	Softening Smart	Postcarbon Ag

STATIONARY FILTERS (FILTERS UNDER THE SINK)

SOFT WATER

GEYSER SMART BIO

Compact system with quick-change cartridges. Due to the unique Aragon Smart Bio cartridge, the filter removes harmful impurities as well as viruses and bacteria from the water. Baskon mineralization technology makes it possible to obtain physiologically valuable drinking water.

- Mineralization of purified water with Baskon technology
- You can drink the water without boiling it
- Reliable protection against bacteria and viruses
- Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
66030	Smart Bio 511	No. 6	Combi Smart	Aragon Smart	Baskon Smart
66031	Smart Bio 511	without a faucet	Combi Smart	Aragon Smart	Baskon Smart

GEYSER ULTRA BIO

Complete water purification with a high filtration rate. The consistent use of Aragon Bio and Disruptor cartridges allows to remove absolutely all harmful impurities, bacteria and viruses from water and increases the service life.

- Preserves the useful mineral composition of water
- You can drink the water without boiling it
- Capacity – up to 7,000 liters
- Ideal for families with little children and persons with allergies

Item	Model	Faucet	First stage	Second stage	Third stage
66026	Ultra Bio 411	No. 6	Sediment	Aragon M Bio, mineralizer B(Ca)	Disruptor

STATIONARY FILTERS

(FILTERS UNDER THE SINK)

SOFT WATER

GEYSER BIO

The Geyser Bio complete water purification system provides 100% purified drinking water from all impurities, including bacteria and viruses.

● Geyser Bio systems have no analogues in Russia. You can drink water without boiling it!

● Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage	Housing color
66024	Bio 311	No. 6	Sediment	Aragon M Bio, mineralizer B(Ca)	Fiber PRO	White
66025	Bio 312					Transparent

GEYSER CLASSIC

System with an increased degree of purification through the use of Aragon and BAF cartridges. The filter cover is designed as a monoblock, which guarantees no leaks.

● Water mineralization B(Ca)

● Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
66028	Classic for soft water	No. 3	Sediment	Aragon M, mineralizer B(Ca)	BAF

GEYSER STANDARD

Water purification system with increased capacity due to the use of BAF cartridge. The filter cover is designed as a monoblock, which guarantees no leaks.

● Removal of chlorine and organic impurities

● Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
19062	Standard	No. 3	Sediment	BAF	CBC
19066	Standard	without a faucet			

STATIONARY FILTERS

(FILTERS UNDER THE SINK)

HARD WATER

GEYSER ECO FOR HARD WATER

Modern compact, efficient system for complete water purification. The housing is made of food-grade stainless steel. The filter is easily connected to the cold water mains with a flexible supply line. Cartridge replacement is quick and easy thanks to the clamp connection.

● **Service life – up to 12 months ***

General technical specifications

Item	Temperature of water to be treated	Faucet	Filtration rate	Operating pressure	Housing	Manufacture
18055	+4...+40°C	No. 6	up to 1.5 l/min	up to 7 atm	stainless steel	Russia

THREE-STAGE FILTERS

General technical specifications

Temperature of water to be treated	Filtration rate	Operating pressure	Housing	Manufacture
+4...+40°C	up to 3.6 l/min	up to 7 atm	food grade plastic	Russia

GEYSER SMART MAX BIO

Unique Geyser Smart Max Bio filter is specially designed for complete water purification and prevention of scale formation. The filter combines two innovative technologies – continuous softening and virus removal. Recommended filtration rate up to 1.5 l/min.

● **Clean, limescale-free water with optimum natural mineralization**

● **Service life – from 6 to 12 months ***

Item	Model	Faucet	First stage	Second stage	Third stage
16031	Smart Max Bio	No. 3	AquaSoft Smart	Aragon Smart Max Bio	Postcarbon Ag Smart

GEYSER SMART MAX

Compact system with quick replacement of filter modules. Effectively removes harmful impurities and reduces hardness due to the Aquasoft ion exchange resin and Aragon Smart Max material. ANTISCALE scale reduction effect. Recommended filtration rate up to 1.5 l/min.

● **Clean, limescale-free water with optimum natural mineralization**

● **Service life – from 6 to 12 months ***

Item	Model	Faucet	First stage	Second stage	Third stage
16030	Smart Max	No. 3	AquaSoft Smart	Aragon Smart Max	Postcarbon Ag Smart

* Service life depends on the degree of salinity of the water.

STATIONARY FILTERS (FILTERS UNDER THE SINK)

HARD WATER

GEYSER SMART

Complete water purification using food-grade ion-exchange resins to remove hardness salts and iron.

- Easy cartridge replacement in a few seconds
- Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
11058	Smart	No. 3	Mechanics Smart	Softening Smart	Postcarbon Ag

GEYSER SMART FOR HARD WATER

Compact monoscope water purification system with quick-change cartridge system. Excellent water purification due to the combination of innovative Aragon and Catalon filter media in the cartridges.

- Prevents the formation of limescale
- Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
16026	Smart for hard water	No. 3	Softening Smart	Aragon Smart	Postcarbon Ag
16028		without a faucet			

STATIONARY FILTERS (FILTERS UNDER THE SINK)

HARD WATER

GEYSER OPTIMA START

Compact system based on quick-release cartridges. Optimal after-treatment of tap water from harmful impurities and excessive hardness salts. Quick cartridge replacement and reliable protection against contact with absorbed contaminants.

Item	Model	Faucet	First stage	Second stage	Third stage
11068	Optima Start	No. 3	Mechanics Smart	Ecotar Smart	Postcarbon Ag Smart
11069		without a faucet			

GEYSER OPTIMA

The compact three-stage filter with quick-release cartridges provides optimum filtration of tap water and prevents scale formation.

Item	Model	Faucet	First stage	Second stage	Third stage
16039	Optima	No. 3	Mechanics Smart	Softening Smart	Postcarbon Ag Smart
16040		without a faucet			

GEYSER MAX

The Geysler Max system is designed to purify hard water. Through the combination of unique technologies AquaSoft and Aragon Max, the capacity of the water softening system is up to 6 times higher than conventional filters without replacement and regeneration of filter elements. Recommended filtration rate up to 1.5 l/min.

● Clean, limescale-free water with optimum natural mineralization

● Service life – from 6 to 12 months

Item	Model	Faucet	First stage	Second stage	Third stage	Housing color
16024	Max	No. 6	AquaSoft	Aragon Max	SVS Ag	White
16025						Transparent

STATIONARY FILTERS (FILTERS UNDER THE SINK)

HARD WATER

GEYSER ULTRA BIO

Geyser Ultra Bio – complete water purification system with high filtration rate. The consistent use of Aragon Bio and Disruptor cartridges allows to remove absolutely all harmful impurities, bacteria and viruses from water.

- Geyser Bio systems have no analogues in Russia. You can drink water without boiling it!
- Ideal for families with little children
- Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage	Housing color
11042	Ultra Bio 421	No. 6	Sediment	Aragon 2 Bio	Disruptor	White
16018	Ultra Bio 431		Aragon 2 Bio	BS		

GEYSER BIO

The Geyser Bio complete water purification system provides 100% purified drinking water from all impurities, including bacteria and viruses.

- Geyser Bio systems have no analogues in Russia. You can drink water without boiling it!
- Prevents scale formation
- Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage	Housing color
11040	Bio 321	No. 6	Sediment	Aragon 2 Bio	Fiber Pro	White
11067	Bio 321	without a faucet				White
11041	Bio 322	No. 6				Transparent
16016	Bio 331		Aragon 2 Bio	BS	Fiber Pro	White
16022	Bio 331	without a faucet				White
16017	Bio 332	No. 6				Transparent

* Service life depends on the degree of salinity of the water.

STATIONARY FILTERS (FILTERS UNDER THE SINK)

HARD WATER

GEYSER CLASSIC

System with an increased degree of purification through the use of Aragon and BAF cartridges. The filter cover is designed as a monoblock, which guarantees no leaks.

- Prevents scale formation
- Microfiltration is the removal of micro impurities and iron
- Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
11044	Classic	No. 3	Sediment	Aragon 2	BAF
11066	Classic for hard water	without a faucet	Sediment	Aragon 2	
16020	Classic for complete water purification	No. 3	Aragon 2	BS	

GEYSER STANDARD

Water purification system with increased capacity due to the use of BAF cartridge. The filter cover is designed as a monoblock, which guarantees no leaks.

- Removal of active chlorine and heavy metals
- Reduces scale formation
- Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
19064	Standard for hard water	No. 3	Sediment	BS	BAF
19067	Standard for hard water	without a faucet	Sediment	BS	BAF

STATIONARY FILTERS (FILTERS UNDER THE SINK)

FERROUS WATER

THREE-STAGE FILTERS

General technical specifications

Temperature of water to be treated	+4...+40°C
Filtration rate	up to 3.6 l/min
Operating pressure	up to 7 atm
Housing	food grade plastic
Manufacture	Russia

GEYSER ULTRA BIO

Complete water purification with a high filtration rate. The consistent use of Aragon Bio and Disruptor cartridges allows to remove absolutely all harmful impurities, bacteria and viruses from water.

- Geyser Bio systems have no analogues in Russia. You can drink water without boiling it!
- Ideal for families with little children
- Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
18052	Ultra Bio 441	No. 6	BA	Aragon Bio	Disruptor

GEYSER BIO

The Geyser Bio complete water purification system provides 100% purified drinking water from all impurities, including bacteria and viruses.

- Geyser Bio systems have no analogues in Russia. You can drink water without boiling it!
- Service life – up to 7,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
18050	Bio 341	No. 6	BA	Aragon Bio	Fiber Pro

STATIONARY FILTERS (FILTERS UNDER THE SINK)

FERROUS WATER

GEYSER CLASSIC

System with an increased degree of purification through the use of Aragon and BAF cartridges. The filter cover is designed as a monoblock, which guarantees no leaks.

● Service life – up to 10,000 liters

Item	Model	Faucet	First stage	Second stage	Third stage
18056	Classic for ferrous water	No. 3	BA	Aragon	BAF

STATIONARY FILTERS (FILTERS UNDER THE SINK)

STANDARD 20SL, 10BB, 20BB HIGH CAPACITY FILTERS

Application: water purification in country houses, kindergartens and schools.

General technical specifications

Temperature of water to be treated	+4...+40°C
Filtration rate	up to 5,0 l/min
Manufacture	Russia

GEYSER ZI 20"SL THREE-STAGE FILTERS

ZI 20" (BA) – for water with high iron content.

ZI 20" – for water with a lot of suspended solids and dirt.

● Service life – up to 15,000 liters

Item	Model	Design	First stage	Second stage	Third stage	Connecting dimensions, inch
32053	ZI 20"	Bracket	Sediment	Aragon 2 (2 pcs.)	SVS	3/4"
32055	ZI 20" (BA)		BA	Aragon (2 pcs.)	SVS	1/2"

GEYSER ZI 20"BB AND 10"BB THREE-STAGE FILTERS

High capacity filters up to 2.5 m³/hour.

The ZI BB20 filter housing (without cartridges) is made on a bracket. The cartridges for the type of water to be treated are selected separately.

Item	Model	Design	First stage	Second stage	Third stage	Connecting dimensions, inch
32062	ZI 20"BB (BA)	Frame	-	-	-	1"
32068	ZI 20"BB (BA)	Bracket	-	-	-	
32061	ZI 20"BB (BA)	Frame	BA	EFM	SVS	
32076	Max 10"BB	Frame	Aquasoft	Aragon 32		
32077	Max 20"BB	Bracket				

STATIONARY FILTERS

(FILTERS UNDER THE SINK)

REPLACEMENT ELEMENTS FOR STATIONARY FILTERS

ARAGON 3 ECO

Composite cartridge for drinking water purification based on Aragon ZH and high quality activated pressed carbon on carbon block technology. It is used in the Geyser Eco filter.

Specification

Item	Temperature of water to be treated	Capacity	Dimensions (height × diameter)	Service life	Manufacture
30060	+4...+75°C	up to 3.6 l/min	170 × 115 mm	up to 12,000 l	Russia

ARAGON 3 ECO MAX

Cartridge for Geyser Eco hard water filter for complete purification and softening with ANTI-SCALE technology.

Specification

Item	Temperature of water to be treated	Capacity	Dimensions (height × diameter)	Service life *	Manufacture
30076	+4...+40°C	up to 1.5 l/min	170 × 115 mm	6 to 12 months	Russia

REPLACEMENT CARTRIDGE KITS FOR THREE-STAGE FILTERS

Item	Name	Intended use	Delivery set
50001	Set 1	3 IVZH/IZH Lux for hard water	PP, Aragon 2, SVS, coupling I**
50003	Set 3	3 IV/I Lux for soft water	PP, Aragon M, SVS, mineralizer B (Ca), insert B, coupling I**
50009	Set 5	3 IVS Lux for extra hard water	Aragon 2, BS, SVS, coupling I**

* Service life depends on the degree of salinity of the water.

** The coupling I is used to install the Aragon cartridge in 10SL standard housings.

STATIONARY FILTERS (FILTERS UNDER THE SINK)

REPLACEMENT PARTS

50035	Set 7	Geyser Bio 321 and 322 for hard water	PP, Aragon 2 Bio, Fiber Pro, coupling I*

50123	Optima Start	Geyser Optima Start	Mechanics Smart, Ecotar Smart, Postcarbon Ag

* The coupling I is used to install the Aragon cartridge in 10SL standard housings.

FILTERS AND HOUSINGS OF WHOLE HOUSE WATER FILTERS

Whole house water filters are designed to purify hot or cold water. Depending on the installed cartridge, mechanical impurities, chlorine, iron, hardness salts, etc. are removed from the water.

B Depending on the model the set may include: bracket and self-tapping screws for attaching to the wall, wrench, nipples (or brass inserts). Food-grade materials are used in the manufacture of the housings. According to their dimensions (the size of the cartridges used) the housings are divided into two types:

- Slim Line (cartridge diameter 61-73 mm), height – 5", 10" and 20"
- Big Blue (cartridge diameter 114-117 mm), height – 10" and 20"

TYPHOON

- Bottom water drain – easy and safe cartridge replacement
- Tie fastening of the cover
- Stainless steel
- Hot and cold water

Item	Standard	Product	Temperature of water to be treated	Operating pressure	Connecting dimensions	Overall dimensions (height × width)	Material	Manufacture

GEYSER BASTION

Compact rinse filter of mechanical purification of the Bastion series. Requires minimum clearance for installation on the mainline. It is used for primary purification of incoming cold or hot water (depending on the filter model) from mechanical impurities (rust, sand, silt and other insoluble impurities) to protect plumbing and household appliances connected to the water supply.

The filter element is a 90 μm stainless steel mesh. Easy to rinse. The filter element can be replaced without removing the filter. A special faucet on the bottom of the housing allows you to quickly and safely drain the water remaining in the filter and filtered impurities.

NEOPRENE HOUSING CASES OF WHOLE HOUSE WATER FILTERS

The anti-condensation cases are designed to prevent condensation from forming on the filter housings due to the difference between the temperature of the water entering the filter and the room air temperature. Protect filter housings from damage. Keeps the room dry, prevents mold and mildew

- Fully waterproof
- Porous structure provides unique thermal insulation qualities
- Resistant to salt water, oils and chemicals
- Protect the filter housing against mechanical damage
- Do not accumulate static voltage
- Easy cleaning with a damp sponge or wash

MEMBRANE SYSTEMS

Membrane systems allow you to get a high degree of water purification from salts of hardness, heavy metals, organic impurities, phenols, bacteria and viruses.

General technical specifications

Temperature of water to be treated	+4...+40 °C
Operating pressure (without pump)	from 3 to 8 atm
Operating pressure (with pump)	from 2 to 8 atm
Power (on models with a pump)	220 V, 50 Hz
Manufacture	Russia

VIVO

Compact and minimalistic filter system without a storage tank.

- All components are inside the impact-resistant housing with carrying handles
- Due to the absence of a pump, the system works quietly
- Maximum operating pressure, up to 7 atm
- Temperature of treated water +4...+40 °C

Item	Model	Membrane	Capacity*	Faucet
20053	Vivo	Geyser 3213-1000 GPD	up to 1700 ml/min	No. 6

* Depends on the temperature, pressure and composition of the source water.

PREMIUM

Reverse osmosis system with a unique AQUAPORIN membrane, which provides natural water of high purity. Made on transparent housings – a high impact type of plastic.

- Aquaporin Inside® technology based on membrane proteins
- Premium drinking water
- Mineralization of water with natural calcium, magnesium and potassium salts

Item	Model	Prepurification	Membrane	Carbon postfilter	Mineralization	Tank, l	Pump	Faucet
20051	Premium	PP5, Mix Block, Mix Block	Aquaporin TWRO 1812-175	+	+	11,4	-	No. 10
20052	Premium P						+	

PRESTIGE SMART

Compact monoscope system with quick-release cartridge replacement system.

- Baskon – final water purification and mineralization
- Clean and healthy water with a balanced mineral composition

Item	Prepurification	Membrane	Postfilter + mineralization	Tank, l	Faucet
20040	Combi Smart	Membrane Smart	Baskon Smart	11,4	No. 3

MEMBRANE SYSTEMS

NANOTECH

Nanotech nanofiltration membrane system is used to remove heavy metals, fine impurities, organic substances and microorganisms from water (reagentless disinfection of water). At the same time the water is softened by 80-85%, which allows you to save the optimal healthy composition of water without additional mineralization.

- Reducing hardness
- Preservation of the mineral composition of purified water
- Reliable prepurification for extended membrane service life

Item	Model	Prepurification	Membrane	Carbon postfilter	Tank, l	Pump	Faucet
20034	Nanotech	PR5, BAF, SVS10	VNF2 1812 50GPD	+	11,4	-	No. 6
20035	Nanotech P					+	

ALLEGRO

Reverse osmosis water purification system. The Geyser Allegro system is made on a monoscope, which eliminates the possibility of leaks.

Item	Model	Prepurification	Membrane	Carbon postfilter	Mineralization	Tank, l	Pump	Faucet		
20036	Allegro	PP5,PP5, SVS10	1812 50 GPD	+	-	12	-	No. 3

20019	Prestige PM		1812-50 GPD	+	+	11,4	+	No. 7

GEYSER PRESTIGE 2

The compact Geyser Prestige 2 system contains a specially designed prepurification unit to purify water with a high content of dissolved iron and hardness salts.

- Prestige 2 filter is 5 times smaller than conventional reverse osmosis systems
- Self-cleaning pre-filter cartridge (capacity – 6,000 liters)
- Minimal operating costs compared to conventional reverse osmosis systems

Item	Prepurification	Membrane	Carbon postfilter	Tank, l	Faucet
20005	sorption module	1812 - 100 GPD	–	–	№ 3
20033		1812 - 50 GPD	+	7,6

PRESSURE BOOSTER

Used to retrofit Geyser Prestige, Geyser Allegro, Geyser Nanotech, Geyser Prestige Smart membrane filters in case of insufficient pressure in the source water supply line. Included: pump on a bracket, high and low pressure switch. It is recommended to use when the pressure in the line is less than 3 atm.

Item	Name	Pump	Housing
25497	Pressure booster	N50C	plastic

REPLACEMENT PARTS

PRE-FILTER

Intended for prepurification of water. Multicomponent filter media will extend the service life of the membrane.

Item	Name	Service life *	Temperature of water to be treated	Manufacture
25582	Sorption pre-filter for Geyser Prestige 2	6-12 months	+4...+40°C	Russia
25682	Geyser Vivo prepurification cartridge	up to 12 months		

COMBI SMART

Provides effective prepurification. Based on Aragon material and high quality coconut activated carbon.

Item	Name	Standard	Service life *	Temperature of water to be treated	Manufacture
30642	Combi	Smart	up to 12 months	+4...+40°C	Russia

ANTIBORON CMAPT

Cartridge with borselective resin. Provides additional treatment of boron as part of the Prestige Smart filter.

Item	Name	Standard	Service life *	Temperature of water to be treated	Manufacture
30743	Antiboron Smart	Smart	500-1000 л	+4...+40°C	Russia

* Service life depends on the quality of the source water.

MEMBRANE SYSTEMS

PARTS FOR MEMBRANE FILTERS

MEMBRANE ELEMENTS, MEMBRANE

Membrane is an element for ultrafine water purification from dissolved impurities, hardness salts, organic and microbiological contaminants.

General technical specifications

Temperature of water to be treated	+4...+40 °C
Operating pressure	from 2.5 to 8 atm
Manufacture	China/Russia/Denmark

CARBON POST-FILTER

It is intended for the final purification of water in reverse osmosis systems, removal of foreign flavors and odors that may appear during prolonged storage of water in a hydraulic accumulator.

Item	Name
27093	Carbon post-filter
25309	Carbon post-filter with connection kit

MEMBRANE SYSTEMS

REPLACEMENT PARTS

MINERALIZER B (RO)

Mineralizer is used to enrich water with healthy minerals after reverse osmosis units.

Item	Name	Service life	Temperature of water to be treated	Manufacture
25537	Mineralizer	up to 12 months	+4...+40°C	Russia
25308	Mineralizer with connection kit			

BASKON MINERALIZER

Unique Baskon technology provides saturation of water with healthy elements (Ca, Mg, K). They are in the dissolved form and are fully absorbed by the body.

Артикул	Название	Service life	Temperature of water to be treated	Manufacture
25654	Installation kit with Baskon mineralizer	up to 12 months	+4...+40°C	Russia

BASKON SMART

Performs final purification and saturates the water with healthy micronutrients (potassium, magnesium, calcium). Reduces RedOx potential and the amount of cell-damaging free radicals, which positively affects the condition of the body.

Артикул	Название	Standard	Service life	Temperature of water to be treated	Manufacture
30643	Baskon	Smart	up to 6 months	+4...+40°C	Russia

COUNTERTOP WATER FILTERS

The Geyser countertop water filter is a simple, economical, stylish and effective water purification solution. It is installed next to the sink.

General technical specifications

Temperature of water to be treated	+4...+40 °C
Filtration rate	up to 1.5 l/min
Operating pressure	up to 7 atm
Manufacture	Russia

ECO MAX

Countertop filter for hard water. The essence of the latest water purification technology in the original design: the cartridge and housing are one piece. It is made of durable and safe plastic. Easy and safe connection to the faucet through the diverter.

Service life – up to 6–12 months *

Item	Name	Cartridge	Temperature of water to be treated	Intended use
18058	Eco Max (countertop)	Eco Max	+4...+40°C	for hard water

* Service life depends on the degree of salinity of the water.

COUNTERTOP WATER FILTERS

Item	Model	Housing color	Cartridge	Intended use

* Service life depends on the degree of salinity of the water.

FILTER FAUCET NOZZLE

GEYSER EURO

Stylish, compact and inexpensive filter for water purification and conditioning. Easy to install on any kitchen faucet design. All necessary adapters are included in the supply set.

● **Total service life – up to 6 months ***

● **Capacity before regeneration – 300–500 l**

General technical specifications

Temperature of water to be treated	+4...+40 °C
Optimal filtration rate	up to 0.5 l/min
Operating pressure	min 0.5 atm
Capacity before regeneration	300–500 l
Cartridge, filter element	Aragon
Housing/color	chrome
Switching water	with a diverter
Manufacture	Russia
Item	61005

REPLACEMENT FILTER ELEMENT

Item	Temperature of water to be treated	Effective porosity	Dimensions (height/diameter)	Manufacture
30050	+4...+75°C	0.1–0.5 µm	125/18 mm	Russia

* Service life depends on the degree of salinity of the water.

PITCHER FILTERS

Pitcher filter is a simple way to purify water in the apartment, in the country house, outdoors. Does not require a fixed connection to the water supply, easy to use, has a high degree of purification, a bright palette of colors and ergonomic size.

Pitcher filter is supplied with a cartridge. The cartridge is screwed into the intake funnel, ensuring a tight connection. The cartridges are available in 2 standards (301 and 501) in 5 modifications: universal, for hard water, for ferrous water, bactericidal and complex.

Pitchers are made of high quality plastic certified for contact with drinking water. They can be put in the refrigerator and washed in the dishwasher.

General technical specifications

Temperature of water to be treated	+4...+40 °C
Filtration rate	up to 0,4 l/min
Cartridge capacity (501/301 series)	up to 350 l/up to 250 l
Cartridge composition	catalon, resin, activated carbon
Manufacture	Russia

PITCHER FILTERS

REPLACEMENT PARTS

The cartridges for Geyser pitchers are based on a fibrous material called Catalon developed and patented by Geyser, which in combination with activated coconut coal, ion-exchange resins and other filtering media purifies the water from bacteria and most of the contaminants of tap water. Cartridges can be installed in Geyser pitcher filters (and with an adapter, in pitchers of other manufacturers).

25011	Universal unit, version 4	

FILTERS FOR PURIFICATION OF ALCOHOL-CONTAINING LIQUIDS

MAKARYCH FILTER PITCHER

Designed for purification of food liquids, including alcohol-containing: vodka, moonshine, rectificate. The Makarych pitcher filter reliably removes fusel oils and aldehydes. This ensures the safety and quality of purchased and homemade alcoholic beverages.

Parts of the filter pitcher and replacement cartridge are made of special food-grade polypropylene, resistant to alcoholic solutions. A combination of specially prepared activated carbon, additionally treated with silver, and catalytic material "Antizetal" based on zeolites is used for filtration. Makarych filter replacement cartridge capacity is 20 liters.

Item	Model	Capacity, l	Total volume of the pitcher, l	Cup volume, l	Manufacturer
62055	Makarych	20	3,4	1,4	Russia

SAMOGONYCH FILTER

- Removes the fusel oils and aldehydes that cause hangovers
- Improves the palatability of purchased and homemade alcoholic beverages
- Compact and easy to use
- The pump allows you to use the simplest purification option: bucket – filter – bottle
- Capacity is 50 liters

General technical specifications

Filtration rate	up to 0.5 l/min	
Liquid temperature	4 - 40 °C	
Power	220V/50Hz

REPLACEMENT ELEMENTS FOR FILTERS

COMPLETE PURIFICATION

mechanical filtration, ion exchange, sorption, disinfection

ARAGON

ARAGON 10SL

ARAGON 3

ARAGON 32

DISRUPTOR

PGS Polymer maximum volume of the active surface

Effectively removes viruses,
bacteria, bacterial cysts,
humic compounds,
heavy metals

ION EXCHANGE

removes dissolved inorganic pollutants:
hardness, iron, heavy metal salts

FE

Twice
the capacity

FE MIX

Removes
colloidal iron

WSFE

Removes iron
and hardness

DUPLEX

Removes iron,
mechanical
impurities

BS

Removes
hardness

FE.

Iron
removal

AKBACOΦT

Water
softening

REPLACEMENT ELEMENTS FOR FILTERS

SORPTION

removes chlorine and dissolved organic pollutants, conditions the water

MIX BLOCK

Produced by coal dedusting technology, which allows you to use the system immediately after installation (without prewashing)

FIBER PRO

Synthesized carbon fiber – high capacity and performance, suitable for hot and cold water

BAF

Multi-component media: ion-exchange fiber (Catalon), coconut carbon, carbon fiber

SVS

Coconut activated carbon – increased sorption capacity

CU

Does not reduce the main line pressure

MECHANICAL PURIFICATION

removes insoluble impurities: sand, silt, rust, scale, suspended matter

PP

Economy option

PYP

High performance

PFM

Enhanced capacity: (porosity gradient – 2 filters in 1)

MESH (RLA, CHK)

Multiple use

REPLACEMENT PARTS BY TYPE OF PURIFICATION

COMPLEX PURIFICATION

ARAGON CARTRIDGES

Cartridge for complete water purification from harmful impurities: salts of hardness, iron, manganese, heavy metals, chlorine and organic compounds. Aragon material completely removes microorganisms (bacteria, bacterial cysts) from water. Additional bacteriostatic protection is achieved by the introduction of silver in an indelible metallic form into the polymer using a special technology. Cartridge produced in Russia.

- Self-indication of service life – a decrease in clean water pressure at the faucet indicates the need to replace or regenerate the cartridge
- Anti-discharge – all filtered impurities are irreversibly trapped in the labyrinth structure of the cartridge
- Regeneration – restoring the cartridge's filtering properties at home significantly increases its service life

Threaded cartridges are used in Geyser housings, as well as 10" Euro standard housings with adapter coupling I or B. The cartridges with the letter E are designed for installation in euro standard housings without adapters.

Item	Name	Standard	Capacity	Intended use	Service life *	Temperature of water to be treated	Type of water	Appearance	
30057	Aragon M Bio	10" SL	2-5 l/min	three-stage filters	up to 7,000 l	+4...+40°C	for soft water

30093	Aragon Smart Max Bio	Smr			three-stage filters of the Smart series	up to 12 months	+5...+40°C	for hard and extra hard water

* Service life depends on the quality of the source water.

REPLACEMENT PARTS BY TYPE OF PURIFICATION

COMPLEX PURIFICATION

DISRUPTOR

Filter material based on a cloth of nanoaluminum fibers with the addition of activated carbon effectively removes viruses, bacteria, bacterial cysts, humic compounds, heavy metals.

Item	Name	Standard	Porosity	Capacity, l	Temperature of water to be treated	Manufacture
28255	Disruptor	10" SL	2 µm	up to 7,000	+4...+40°C	Russia

ION EXCHANGE

DEFERRIZATION

CATALON FE, CATALON FE MIX, CATALON DUPLEX

The Fe cartridge is made of cation-exchange cord and removes dissolved and undissolved iron. Fe mix is made of cation-exchange and anion-exchange fiber in the form of a cord. Additionally reduces water color and removes colloidal iron. The Catalon Duplex cartridge purifies water from dissolved iron, heavy metals and mechanical impurities.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
28123	Fe *	10" SL	55 000	+4...+60°C	Russia
28124		10" BB	160 000		
28125		20" BB	320 000		
28070	Fe mix	10" SL	40 000		
28071		10" BB	125 000		
28072		20" BB	250 000		
28338	Catalon Duplex	10" SL	10 000		
28339		10" BB	37 500		
28340		20" BB	75 000		

* Aragon Bio, Fe(Catalon) 10 SL certified according to standard: NSF/ANSI 42-2019.

REPLACEMENT PARTS BY TYPE OF PURIFICATION

ION EXCHANGE

DEFERRIZATION

FE.

Are used to remove dissolved and oxidized iron, manganese and heavy metals. Made of cation-exchange material.

10" SL – ion-exchange backfill material with a 5 µm polypropylene post-filter at the outlet.

10" BB, 20" BB – 25-50 µm polypropylene pre-filter, cation-exchange material, coconut charcoal with silver, 5 µm post-filter.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
28201	Fe.	10" SL	12 000	+4...+40°C	Russia
28199		10" BB	50 000		
28200		20" BB	100 000		

ION EXCHANGE

DEFERRIZATION + SOFTENING

ECOTAR SMART

Mixture of food grade ion exchange resins for highly effective removal of hardness salts (scale), iron and manganese.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30646	Ecotar	Smart	up to 500	+4...+40°C	Russia
30648	Aquasoft		up to 2000		

WSFE

Combination of heavy metal removal and water softening technologies in one cartridge.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30635	WsFe	10" SL	12 500	+4...+40°C	Russia

* Service life depends on the degree of salinity of the water.

REPLACEMENT PARTS BY TYPE OF PURIFICATION

ION EXCHANGE

DEFERRIZATION + HYDROGEN SULFIDE REMOVAL

RSFE

The Geyser RSFE cartridge effectively removes dissolved iron from water up to 3 mg/l, and also reduces the concentration of hydrogen sulfide and sulfides in water up to 5 times. The cartridge consists of a multi-component media with powerful oxidizing properties, including removal of hydrogen sulfide and sulfides. Geyser RSFE 10BB, 20BB can be installed with other cartridges (Aragon 3 10, 20BB, BAF 10, 20BB, and others).

Item	Name	Standard	Capacity	Temperature of water to be treated	Manufacture
28509	RSFE 10BB	10" BB	6 months	+4...+35°C	Russia
28510	RSFE 20BB	20" BB			

OXIDATION (CATALYTIC)

BA

The BA cartridge is designed to effectively remove excess dissolved iron (up to 1.5 mg/l) by catalytic oxidation. The filtering medium is natural calcite. It is used in Geyser filters designed for ferrous water.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30604	BA	10" SL	2 000	+4...+40°C	Russia
30605	BA	20" SL	4 000		
30606	BA	10" BB	5 000		
30607	BA	20" BB	10 000		
35751	Replacement media	10" SL	2 000		
35752	Replacement media	10" BB	5 000		

REPLACEMENT PARTS BY TYPE OF PURIFICATION

ION EXCHANGE

SOFTENING

AQUASOFT

Food grade ion exchange resin cartridge for use in Geyser Max filters.

Item	Name	Standard	Capacity	Temperature of water to be treated	Manufacture
30648	Aquasoft	Smart	12 months	+5...+40°C	Russia
30636	Aquasoft	10" SL	2,000 l	+4...+40°C	
35863	Replacement media				

BS

BS cartridge serves to remove excessive hardness salts from water on a food grade cation exchange resin. The ability of the media to remove hardness salts is restored after a simple regeneration with a solution of table salt. Used in Geyser filters to purify hard and extra hard water.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30608	BS	10" SL	500	+4...+40°C	Russia
30609		20" SL	1 000		
30610		10" BB	1 500		
30611		20" BB	2 000		
35753	Replacement media	10" SL	500		
35754		10" BB	1 500		

SOFTENING SMART

Contains food grade ion exchange resin. Removes hardness salts (scale), iron and manganese.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30641	Softener	Smart	500	+4...+40°C	Russia

REPLACEMENT PARTS BY TYPE OF PURIFICATION

SORPTION

MIX BLOCK

The new premium carbon cartridge is made of high-quality coconut activated carbon with the addition of the unique ion-exchange material Catalon with the addition of silver. Mix Block is made by the coal dedusting technology, which allows you to use the system immediately after installation (without prewashing).

- **Has a mechanical filter in the form of a polypropylene mesh, which excludes the passage of filter media outward**
- **Increased silver content prevents the multiplication of filtered bacteria and microorganisms**

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Porosity	Manufacture
27132	Mix Block	10" SL	10 000	+5...+53 °C	0.6 μm	Russia
27138					10 μm	
27140		20" SL	20 000		0.6 μm	
27141					10 μm	

Fiber Pro / MMB

The cartridges are made of high quality carbon fiber, which has a greater absorption surface and a longer service life than other types of carbon cartridges. Effectively remove organic and organochlorine compounds, free chlorine, unpleasant odors and foreign taste. The addition of silver in the filter material of the cartridge provides a bacteriostatic effect.

Item	Name	Standard	Capacity, l	Temperature of water to be treated	Porosity	Manufacture
27050	MMB	10" SL	20 000	+4...+70 °C	1–2 µm	USA
27052		10" BB	40 000			
27053		20" BB	80 000			
27113	Fiber Pro	10" SL	15000	+4...+40 °C	1–2 µm	Russia
27114		10" BB	40 000			
27115		20" BB	80 000			

BAF

The cartridge contains a multi-component media of Catalon material and granular carbon to clean water from residual chlorine, organic compounds, iron and other harmful impurities.

Артикул	Name	Standard	Capacity, l	Temperature of water to be treated	Manufacture
30632	BAF	10" SL	12 000	+4...+40 °C	Russia

REPLACEMENT PARTS BY TYPE OF PURIFICATION

SORPTION

CARBON AG SMART

Contains a multi-component media based on carbon sorbents and ion-exchange materials. Removes dissolved and colloidal iron, heavy metals, chlorine and organic compounds. Contains silver in indelible form.

Item	Name	Standard	Service life *	Temperature of water to be treated	Manufacture
30639	Carbon Ag	Smart	12 months	+4...+40°C	Russia

CARBON BLOCK AG SMART

Performs the final purification of water with high quality activated carbon. Silver in a safe form blocks the growth of bacteria.

Item	Name	Standard	Service life *	Temperature of water to be treated	Manufacture
30645	Carbon Block Ag	Smart	12 months	+4...+40°C	Russia

POSTCARBON AG SMART

Contains high quality coconut carbon and Catalon material, which allows to remove residual chlorine and organochlorine impurities from water, to further purify iron and heavy metals and to improve the water taste and color. Silver in a safe form blocks the growth of bacteria.

Item	Name	Standard	Service life *	Temperature of water to be treated	Manufacture
30640	Postcarbon Ag	Smart	12 months	+4...+40°C	Russia

* Service life depends on the degree of salinity of the water.

REPLACEMENT PARTS BY TYPE OF PURIFICATION

MECHANICAL PURIFICATION

Cartridges are used to purify water from suspended solids and insoluble impurities. This is a simple and effective way to protect plumbing and household appliances.

The degree of purification is determined by the size of the pores in the cartridge. The cartridges use: stainless steel mesh (CHK, RLA series), polypropylene cord (PPY, PYP, SFE series), foamed polypropylene (PFM, EFM, PP series).

STAINLESS STEEL MESH

CHK

CHK series cartridges are designed to purify water from insoluble impurities. Made of stainless steel mesh. The cartridges are reusable and can be cleaned manually. Capacity is not limited.

Item	Name	Standard	Temperature of water to be treated	Porosity, μm	Manufacture
28197	CHK15	10" SL (64 мм)	+4...+100°C	15	Китай
28065	CHK25			25	
28198	CHK50			50	
28111	CHK70			70	
28112	CHK90			90	
28446	CHK50	10" BB		50	
28447		20" BB			

RLA

Polypropylene mesh cartridge with hardness frame to clean cold water from mechanical impurities is used to protect pumps. The cartridge can be rinsed repeatedly.

Item	Name	Standard	Temperature of water to be treated	Porosity, μm	Manufacture
28106	RLA	10" SL	+4...+40°C	80	Китай

REPLACEMENT PARTS BY TYPE OF PURIFICATION

MECHANICAL CLEANING

POLYPROPYLENE CORD

PPY

PPY series cartridges are designed to purify water from insoluble impurities. Made of polypropylene cord. Have a higher dirt capacity than other sediment cartridges. Cannot be restored or regenerated.

Item	Name	Standard	Capacity, l*	Temperature of water to be treated	Porosity, µm	Manufacture
28048	PPY 5-10SL	10" SL	50 000	+4...+40°C	5	Russia

POLYPROPYLENE FOAM

PFM

PFM series cartridges are made of polypropylene foam and are designed for purification of water from insoluble impurities. In contrast to PP have a gradient porosity: pore diameter decreases with the movement of water inside the cartridge, so that the entire volume of filter material works. The cartridges have modifications for hot water (PFM G). Cannot be restored or regenerated.

PFM Ag cartridges are produced with silver added to the material.

Item	Name	Standard	Capacity, l*	Temperature of water to be treated	Porosity, μm		Manufacture
				Cold water	inside	on the surface

CORRUGATED

The PPL pleated cartridge is designed for mechanical cleaning of cold water. The pleated design allows you to significantly increase the useful filtration area, filtration rate and service life of the cartridge. Made of raw materials suitable for contact with food, allowing it to be used in a variety of systems. Reusable.

PPL

Item	Name	Standard	Capacity	Temperature of water to be treated	Porosity, μm	Manufacture
28303	PPL	SL 10"	10,000 l	+4...+35°C	30	Russia
50724	PPL	BB 10"	up to 6 months *		5	China
50764	PPL	BB 20"			5	

* Service life depends on the degree of salinity of the water.

COMBINED

COMBINED PURIFICATION

POLYPROPYLENE FOAM

PP+GAC, AQUASOFT LIGHT

PP+GAC 10SL combined purification cartridge made of propylene foam and granulated coconut activated carbon. Aquasoft Light is a combined purification cartridge made of propylene foam and a mixture of ion exchange resins.

Polypropylene removes insoluble impurities: mechanical particles, oxidized iron (rust), silt, sludge. Activated carbon performs water conditioning – removes organic compounds, improves organoleptic characteristics of water – taste, color and smell.

Aquasoft reduces hardness and prevents scale formation.

Item	Name	Standard	Capacity	Temperature of water to be treated	Porosity, µm	Manufacture
28459	PP5 + GAC	SL 10"	up to 6 months	+4...+38°C	5	China
30738	Aquasoft lite			+4...+40°C		Russia

* Capacity depends on the quality of the water.

FILTERS FOR THE PROTECTION OF HOME APPLIANCES

DO NOT USE FOR DRINKING WATER!

They are used to protect boilers, washing machines and dishwashers. The filters are made of durable plastic and are easy to install on the cold water line.

Transparent filter housing allows you to monitor the presence of the media. If the polyphosphate is more than half dissolved, the filler must be replaced.

The recommended replacement time is once a year regardless of the amount of remaining media.

- Reduces the formation of lime deposits (scale)
- Protects the heating element of boilers, washing machines and dishwashers
- Reduces energy consumption
- Reduces detergent consumption
- Provides gentle washing (laundry becomes softer without the use of special detergents)
- Binds dissolved iron, preventing yellow streaks on laundry

1PF (FOR WASHING MACHINES)

Item	Temperature of water to be treated	Maximum operating pressure	Connecting dimensions	Manufacture
32063	+4...+40°C	6 atm	3/4"	Russia

REPLACEMENT PARTS BY TYPE OF PURIFICATION

TECHNICAL PURIFICATION

BF

DO NOT USE FOR DRINKING WATER!

Polyphosphate cartridges prevent scale formation on the heating elements of boilers, washing machines and dishwashers. Regardless of the amount of polyphosphate remaining in the cartridge, replace the media at least once a year.

for Geyser housing

CARTRIDGE HOUSINGS FOR BACKFILL CARTRIDGES

Item	Name	Manufacture
50047	10" SL (disassemblable)	Russia
50056	10" SL (разборный, прозрачный)	China
50621	10" SL (disassemblable, transparent)	China
50606	10" BB (disassemblable)	Russia
50657	20" BB (disassemblable)	Russia

ДИВЕРТОРЫ

Item	Name	Description
25020	Diverter (top) 10.2 mm	To switch the water flow to the faucet or filter when connecting a nozzle or table filter to a faucet with an aerator.
25102	Diverter (top) 7.8 mm	Screws on the faucet with M 22 threads instead of the aerator (imported faucet).
25468	Diverter (double)	For Eco Max countertop filter.

ADDITIONAL EQUIPMENT AND PARTS

BRACKETS FOR HOUSINGS

Item	Name	Material
25221	Single bracket for securing standard BB housings	metal
25246	Triple bracket for securing standard BB housings	

INTERNAL INSERTS AND MINERALIZER FOR THE ARAGON CARTRIDGE

Item	Name	Description
25030/25031	U/UV	Replacement charcoal insert/shortened
25032/25058	S/SV	Replacement insert with ion exchange softening resin/shortened
25038	Q	Replaceable quartz insert. It is used in the Aragon cartridge for hot water
25057	B	Insert for installing the mineralizer
25033	Mineralizer B(Ca)	Calcium and magnesium mineral salt dispenser container

ADAPTERS

Item	Name	Description	
25003	Universal unit, version 2 M	For quick operational connection of nozzle filters and table filters to imported faucets with aerator (M 22 x 1 mm threaded spout). Color: white	
25010	Universal unit, version 3	Enables the use of cartridges in pitchers from other manufacturers	
25011	Universal unit, version 4		
25479	Coupling (nipple adapter 22/20)	Metal	Adapter nipple from the thread of M 22 x 1 mm to the thread of M 20 X1, M 24 x 1, M 28 x 1. For faucets with aerator
25099	Coupling (nipple adapter 22/24)	Metal	
25005		Plastic	
25478	Муфта (ниппель переходной 22/28)	Metal	
25006	IDA-01 Adapter	For connection to faucets without aerator, devices with M 22 x 1 thread (top diverter, etc.)	
50611	SL Coupler	For connecting SL cartridges	
50612	BB Coupler	For connecting BB cartridges	
25009	Sealing coupling, type I	For installing Aragon cartridges, including those with additional inserts (U, S, Q, etc.) in eurohousings	
25008	Sealing coupling, type B	For installing Aragon cartridges in eurohousings (without insert)	

FAUCETS AND MIXER TAPS FOR CLEAN WATER

Made of high quality brass with nickel-chromium plating. The faucet spout is made of stainless steel.

TEST KITS

FOR WATER ANALYSIS

TEST KIT FOR ANALYZING TAP WATER FOR 12 PARAMETERS

Analysis of total hardness, total iron, manganese, pH, permanganate index, mineralization by TDS, total alkalinity, chlorides, aluminum, turbidity, color, odor.

Item	Name	Parameters
55420	Test kit for tap water	12 parameters

TEST KIT FOR ANALYSIS OF WELL WATER (16 PARAMETERS)

Compared with the test kit for 12 parameters added: divalent and trivalent iron, ammonium, nitrite, nitrate. Aluminum content is not tested.

Item	Name	Parameters
55412	Test kit for analysis of well water	16 parameters

TEST KIT FOR ANALYZING WATER FROM A WELL (19 PARAMETERS)

Compared with the test kit for the analysis of water for 16 parameters added: sulfates, fluorides, boron.

Item	Name	Parameters
55421	Test kit for analysis of well water	19 parameters

TEST KIT FOR ADVANCED WATER ANALYSIS (27 PARAMETERS)

Compared with the test set for 19 parameters added: magnesium, calcium, copper, aluminum, barium, hydrocarbonates, dry residue, hydrogen sulfide and sulfides.

Item	Name	Parameters
55413	Test kit for advanced water analysis	27 parameters

TEST KIT FOR WATER ANALYSIS FOR ALPHA AND BETA ACTIVITY

Analysis of natural and drinking water for total alpha and beta activity and for measuring alpha activity.

Item	Name	Parameters
55411	Test kit for water analysis for alpha and beta activity	2 parameters

RADON TEST KIT FOR WATER RADIONUCLIDE ANALYSIS (RADON-222)

Analysis of natural and drinking water for Radon-222.

Item	Name	Parameters
55416	Test kit for water radionuclide analysis (Radon-222)	1 parameters

EXPRESS TEST FOR WATER ANALYSIS 8 IN 1

Designed for express analysis of water (from centralized water supply, boreholes, wells and other reservoirs) on the content in it: nitrates, nitrites, total hardness, active chlorine, total iron, dissolved iron, acidity (pH), organic impurities (permanganate oxidation).

The 8-in-1 express test makes it possible to determine eight basic water parameters in just 20 minutes.

Item	Name	Parameters
55395	Express test for water analysis 8 in 1	8 parameters
